

Flexible LED Sheet – 4000K

Flexible 24V LED light sheets in a 240mm × 480mm format, delivering 20W of 4000K neutral white light for smooth, even backlighting and display illumination. The thin, low-profile sheet can conform around gentle curves and is suited to light boxes, transparent stone or glass, cabinetry, signage and custom display applications.

Core Features

- Flexible 20W LED light sheet
- Designed for backlighting transparent stone, countertops and signage
- 1 sheet-to-sheet connector included
- 4000K light temperature
- Horizontal, vertical and diagonal cut lines allow custom shapes
- 1 sheet-to-2-pin wire connector included

Specifications

Voltage	24V DC
LED Temperature	4000K
Sheet Width	240mm (9-7/16in)

Power	20W per sheet
Sheet Length	480mm (18-15/16in)

Installation

The sheet has 3M adhesive backing. Peel off the backing and adhere the sheet to the surface behind the item to be backlit.

Compatibility

Compatible with Atlantic LED's drivers, sensors and controllers.

Included Connectors

- One single-ended lead for powering an individual sheet
- One double-ended lead for linking sheets together in a run
